## SYSTEM AND METHOD FOR DEINTERLACING A VIDEO SIGNAL FOR DISPLAY ON PROGRESSIVE DISPLAY DEVICES

## ABSTRACT OF THE DISCLOSURE

5

A system and method for processing a video signal to make the corresponding image suitable for display on a progressive display device, i.e., a computer monitor, is disclosed. The processing system includes a video display module which is capable of processing an image frame based on the content of the frame information itself, or the values of the pixels that comprise the frame.
